### PROFESSIONAL SUMMARY

Certified Web Developer with proven ability to develop functional and dynamic web applications using various programming languages and frameworks on both client and server side using modern technologies. Skilled in effective communication, attention to detail and efficient problem solving. Committed to constantly learning and developing skills whilst bringing a great deal of innovation to the company.

### WEB DEVELOPMENT PROJECTS

#### MEET-APP

2023

Personal Project, CareerFoundry

- Web application developed with React using a test-driven development (TDD) technique
- This application is intended to be a serverless, progressive web application (PWA)
- Hosted in a Git repository on GitHub
- Implementing an OAuth2 authentication flow and the Google Calendar API to fetch data

#### MY FLIX-CLIENT

2022

Personal Project, CareerFoundry

- Develop a single page application (SPA) using React and in ES2015+, build the client side for an app called myFlix based on its existing server-side code (REST API and database)
- Use state routing to navigate between views and share URLs
- Use Parcel as a build tool

#### CHAT-APP

2023

Personal Project, CareerFoundry

- Developed a chat application for mobile devices using React Native
- Developed using Expo and use Google firestore database to store chat
- Use Google Firebase authentication to authenticate users anonymously
- Use Bootstrap as UI library for styling and responsiveness
